

Domain Platform V2+ Roadmap

Prepared for future development after V1 launch.

V1 Goal (Launch Now)

Focus on domain tracking, WHOIS lookup, SSL monitoring, hosting tracking, renewal notifications, affiliate monetization, SEO pages, blog system, admin panel, SMTP and cron stability.

V1.1 (First 30 Days)

- CSV Import
- Bulk Domain Check
- Telegram Notifications
- Weekly Summary Reports

V2 (After Revenue Validation)

Domain Intelligence Layer

- Registrar analysis
- Domain age analysis
- SSL and DNS health checks
- Renewal recommendations

AI Domain Advisor

Generate AI-powered health reports and recommendations for tracked domains.

Portfolio Health Score

Provide portfolio-level quality and risk scoring for investors and agencies.

V3 (Business / Enterprise)

- Brand Monitoring
- Competitor Domain Tracking
- Team Accounts and Roles
- Webhook Automation

V4 (Premium SaaS Stage)

- AI Domain Valuation
- AI Brand Risk Engine
- Expiring Domain Marketplace
- Dropcatch Alerts

Recommended Execution Order

1. Launch V1 immediately.
2. Validate SEO and affiliate revenue.
3. Add CSV import, bulk checks and notifications.
4. Introduce AI features only after revenue validation.
5. Build enterprise features.
6. Develop marketplace and valuation products.
